

## Improving the Factory Building

Running an efficient factory does not just depend on the productivity of its machinery - there are many other factors which need to be taken into consideration.

The efficiency and effectiveness of the services supplied to the factory for example are usually key to a factory's quality of operation - particularly in the areas of ventilation, cleanliness and safety.

Smart Manufacturing is experienced in manufacturing and installing many types of equipment to improve factory buildings:

- General Ventilation
- Local Exhaust Ventilation (LEV) systems
- Ducting for Air Conditioning
- Heat Exchange Systems
- All types of Extraction Systems
- Pipework
- Kerbing
- Staircases
- Access Walkways

If you would like to discuss how we might be able to improve your factory building please contact us:
